Induction

Induction

For many, Induction is a visitor Ipad on reception, but the work based staff & contractor Induction is a complex issue driven by ever expanding WorkCover safety legislation. When using onsite labour, you need to know when staff & contractors are accessing your sites, and what level of Induction is required.

4Links Induction uses scalable, mobile technology, you can develop inductions for a wide range of applications, including sites, plant & equipment in any location.

Induction uses our integrated forms designer, it takes minutes to design a form with images, videos, animation, choices, text and detailed check lists. You can map them to single or multiple sites, reducing the need for suppliers to complete multiple paperwork.

KEY FEATURES

FORMS DESIGNER
- ☑ Bundled templates
- ☑ Passive or interactive question / answer with pass / fail mode
- ☑ No exposure to form design changes

VIDEO AND SLIDE MODE
- ☑ Text based responses
- ☑ Insert maps & photos
- ☑ Insert video

QUESTION MODE
- ☑ Supports simple views and question-and-answer view
- ☑ Allows complex questions or prompts for hints & pass/ fail

INTELLIGENT ASSESSMENT
- ☑ Forms can be linked to weightings to generate pass fail assessments

CLOUD ACCESSIBILITY
- ☑ Cloud based delivery to phone and tablet
- ☑ Network connectivity to central dashboard

MULTI-LEVEL INDUCTION FOR:
- ☑ Contractors
- ☑ Employees
- ☑ Sites
- ☑ Mobile plant
- ☑ High-risk tasks
- ☑ Links to SWMS and JSA forms
- ☑ Safety training

AUTOMATED GREEN / RED FLAG STATUS
- ☑ Automatic linkage to trade checks
- ☑ Red / green flag status
- ☑ Status by employee
- ☑ Status by contractor

ONBOARDING MODE
- ☑ Integrated onboarding
- ☑ Fully integrated with eCheck
- ☑ Free to suppliers
- ☑ Unlimited users
- ☑ Unlimited forms generation

KEY BENEFITS

Multi Task Solution

Audits for products and people

- ☑ Induction integrates with all 4Links Apps so there are no third party products or software issues. Our forms designer handles a broad range of requirements including text based data, check boxes, PowerPoint slides, animation, video and interactive questionnaires.

- ☑ Design can be passive or interactive with pass / fail scorecards for testing applicants on key elements.

- ☑ Inductions can be generic across multiple sites or site specific allowing contractors to complete the required level of certification

- ☑ Combined with our eCheck App, Inductions is a complete solution for all compliance & training needs.

Cloud based

Single Cloud Based Platform

- ☑ Induction is cloud based, its easy to link inductions with the sites and equipment you need to manage.

- ☑ Develop generic Induction for WorkCover safety or sites with mobile access for external & internal users.

No supplier fees

Shared Supplier Pool

- ☑ Switch Induction on for a low monthly fee, unlimited users, and no charge to suppliers.

APP SPECIFICATIONS

Induction
- Site access
- New employees
- Contractors
- Plant / equipment
- Credentialing
- Visitor Access

Online registration
- Free user access
- Link to onboarding wizards
- Fully integrated reporting

Induction styles
- Visitor
- Employee
- Sub-contractor
- Task / activity

Cloud Access
- Dashboard
- Tablet
- Phone
- PC

Integrated Designer
- Customisable
- Text
- Choices
- Text list with hints and pass-fail flags
- Slides

- Video
- Images
- Maps
- Unlimited Qs
- Integrated check lists
- Employee photo link
- Induction Mapper
- Maps supplier to sites
- Maps people to sites
- Maps Inductions to sites
- Maps Inductions to tasks or plan

Intelligent assessment
- Set score triggers on responses
- Set hint on questions
- Set auto pass fail on check list question
- Run a view mode
- Run as question answer mode

Automated Status Board
- Link to supplier status board
- Link to eCheck
- Red / green flag indicator for Staff & Suppliers
- Provide supplier / employee views
- Instant supplier and employee status

Visitor Access
- Log access
