

SMART Platform

OpenCatalogue

OpenCatalogue *with P2P*

Open Catalogue is a completely new way to manage regular procurement items with a web style shopping basket, and complex product data presented in an easy to read style. Using supplier driven data to build your own custom catalogue is a great solution to quickly find, compare & buy.

OpenCatalogue is a hybrid of tender, order catalogue, specification brochures and buying cube all in a user-friendly shell. It takes minutes to build 100's of preset fields, it's highly customisable so you can add unlimited technical specifications along with multiple

currencies, volume buy rates, warranty pricing, maintenance, online consumables, technical standards and manuals.

OpenCatalogue replaces 3-year tender cycles with continuous connection to your supply panel. Stepping into a price driven world is simple, you specify your product requirements, invite suppliers and they push content and pricing back to your OpenCatalogue, which presents continuous buy positions to you. Price benchmarking, product comparisons and ratings, allow you to be in touch with the market 24/7.

KEY FEATURES

AUTOMATED CATALOGUE DESIGNER

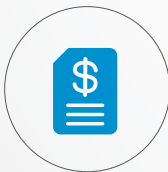

- ✓ Automated creation
- ✓ Common 100 fields pre-built
- ✓ Multiple SKUs and parts number systems

- ✓ Unlimited users
- ✓ No supplier fees
- ✓ No per user fees
- ✓ Unlimited catalogues
- ✓ Click in access controls

IMPORT AND ONLINE

- ✓ Supplier data entry
- ✓ Supplier batch import
- ✓ Lone item, audit trails on changes

KEY USAGE

- ✓ Complex plant
- ✓ IC&T equipment
- ✓ Medical products
- ✓ Products with complex technical data

KEY BENEFITS

Single Cloud
Based Platform

Buyers

OpenCatalogue forms a bridge between internal stakeholders eg. the technical user, needing deep technology data, and the strategic buyer wanting price trends & volume buy leverage.

OpenCatalogue allows you to scale your needs, you may have an order catalogue but need technical data feeds, parts and accessories, or you can run it using the integrated shopping basket and P2P cycle to manage the order life cycle all within a single application.

Shared
Supplier Pool

Suppliers

Suppliers want to expand their market, but reaching buyers is almost impossible from their own website. OpenCatalogue provides a unique opportunity to present new products, specials, price advantages and innovations directly to relevant buyers and vastly improve the flow of information.

APP SPECIFICATIONS
